

Create Personalized Engagement at Scale

Our software and integrations complement your *current* tool set to help you...

1 Disciple Better

By harnessing data, we assist you in understanding the journey of your members. We then showcase their distinct discipleship steps on the in-app Member Dashboard, using iconography to create a highly engaging and interactive roadmap for them to follow.

2 Engage Better

We integrate ChMS data to create a comprehensive view of your member base. This enables your communications team to effectively organize and segment individuals to engage with them in a unique and personal way.

3 Communicate Better

Create, manage, and optimize your communications with game-changing segmentation all within one platform. Your team will send far fewer emails and texts and far more targeted and relevant messages, directly to your *current* church mobile app.

“I’ve been in church ministry for 20+ years and this is the coolest thing I’ve seen.”

George Botha
Journey Church, Florida

Every step made clear.
